MICROSOFT AUTHENTICATOR

Why do I need the Authenticator app

If an employee wants to access Office 365 systems (Word, Excel, Teams, Outlook, OneDrive, etc.) on their phone, they need to download the **Intune Company Portal** app.

If an employee wants to access Office 365 systems (Word, Excel, Teams, Outlook, OneDrive, etc.) outside the hospital's network (where the employee is connected to LSH internet), they need to authenticate on their phone. This is done using an app called **Microsoft Authenticator**.

How do I download the Authenticator app?

Iphone

Go to the App Store and search for Microsoft Authenticator. Click Get and then Open.

1. Next, you need to set up the app and sign in with your Landspitali username and password.

Then the screen should look like this:

- 2. Now you need to activate the access on your computer. Open a browser on your computer and open the site **myprofile.microsoft.com**.
- 3. Sign in to your account with your Landspítali username and password.
- 4. Click on **Security info** on the left in the menu.

	Back Next		Back Nex	đ

- 8. Now you need to open the **Authenticator** app on your phone. Click **Allow** when the app asks for permission to send notifications.
- 9. Click the **plus sign (+)** in the top right corner, select **Work or school account** and then **Scan QR code**.

- 10. Use your phone to scan the QR code on the computer screen. Your account will automatically be added to the app on your phone (you might need to select **Allow** when Authenticator requests access to the camera).
- 11. After scanning the QR code, click **Next** on the computer screen. A number will appear on the computer screen. You need to enter this number in the app on your phone.

Microsoft Authenticator

Let's try it out

Approve the notification we're sending to your app by entering the number shown below.

72

Back Next

12. A window should now appear on the computer that says **Notification approved**. Click **Next**.

13. Now your phone should look like this:

14. Now your computer screen should look like this:
